

DOORBELL

Z-Wave appliance which makes your front door smarter.

Doorbell from Aeotec makes your front door a part of your connected home. A two piece package, it offers an 80dB speaker for inside your home along with a wireless button for outside of it. Both LED lights and tones will alert you to someone being at your door, and you can personalise your Doorbell with up to 100 different tones.

Doorbell is easy to install. Its speaker simply plugs into a power outlet, and its button can be easily installed beside your front door with double-sided tape or small screws. You'll find those easy installation methods provided in Doorbell's box, along with the USB cable that'll allow you change its alert tones.
